

Infor OS[■]

Your future-proof operating service

infor

TM

An enterprise operating service with a conversational user experience

Infor® OS is your operating service for the future, designed to serve as the foundation for your digital transformation in whatever form it may take. Its focus is on delivering technology that goes beyond enabling business—to driving it, putting the user at the center of every experience and serving as a unifying foundation for your entire ecosystem. The result is a connected, intelligent network that automates, anticipates, predicts, and informs your stakeholders in everything they do.

Seamless integration

Purpose-built middleware unifies enterprise systems, providing organization-wide visibility

Science-powered analytics

Deep analytics and business intelligence support superior decision-making

Conversational user experience

A consumer-inspired user experience, plus voice and chat commands, make software intuitive and easy-to-use

The Infor strategy

A modern foundation for driving transformation and progress in enterprises across every industry.

Hello, Coleman

A.I. that maximizes human potential

Infor Coleman is a powerful artificial intelligence assistant designed specifically for business users—and built upon a foundation of industry-specific data. At any given moment, it can help you determine:

- If you have a problem
- If you're about to have a problem
- And what you should do to resolve or prevent a problem

From executing tasks to recommending next best sales offers or even predicting maintenance issues, Coleman helps you work smarter and faster.

The NASA pioneer who inspired Infor Coleman

Named after physicist and mathematician Katherine Coleman Johnson, whose trail-blazing work helped NASA land on the moon, Coleman represents a giant leap forward for artificial intelligence at scale—incorporating deep reservoirs of network data to serve the needs of human minds and make connected devices infinitely smarter.

It's not here to replace your job—Coleman's here to help you do your job exponentially better.

One singular platform

Endless opportunities to make technology a competitive advantage

Your business is growing. Your industry is evolving. Your customers' needs are changing. Your workforce is shifting. What's next? Be ready with Infor OS.

Have systems that bend without breaking

Infor OS is based on the architecture of the internet—flexible, scalable, adaptable, and open. One application can be upgraded, replaced, or even fail without taking your entire network down.

Turn information into action

Infor OS's Data Lake and data visualization capabilities work across systems to deliver information automatically based on users' specific roles and priorities.

Be prepared

For whatever opportunities or challenges come next. Infor OS gives you the flexibility to add to and modify systems as your business grows, while cloud deployment provides a secure, cost-effective, simplified, and forever modern enterprise infrastructure.

Work your way

Personalized and customizable homepages for specific roles, teams, or areas of interest aggregate processes and deliver information automatically to users, while single sign on and a consumer-inspired user interface make applications easy, intuitive—even fun—to use.

Specialize without customizing

Infor OS serves as the foundation for Infor's broad, deep, and industry-focused solution portfolio. From pre-built industry analytics to industry-driven business processes, roles, and views, you get the specialized functionality you need without limiting and costly customizations.

Work smarter

Infor OS embeds collaboration, document management, and business process management within enterprise systems to support real-time collaboration and information sharing.

Continuous evolution—enabled by Infor OS

Staying current is no longer a matter of choice—it's a matter of survival. Now is the time to give your enterprise the agility, intelligence, and cost-efficiency it needs to differentiate itself from competitors in an increasingly level playing field.

With Infor OS, your company gets deep analytics, advanced collaboration, and powerful development tools—all with a mobile-first design, open source compatibility, and powerful integration capabilities to make unified management a reality.
